FROM: Pacific Flyway Representative

SUBJECT: Pacific Flyway: Mail Questionnaire Harvest Survey Results, 1965-2001

This year marks an end to an era in the monitoring of our Nations waterfowl harvest. The Mail Questionnaire Survey (MQS) was not conducted to estimate the 2002-2003 harvest and will not be conducted in the future. The reason is that the Harvest Information Program (HIP) has replaced this method of estimating the annual migratory bird harvest. At present, final refinements are still being made to the HIP procedures, and thus we will not combine harvest estimates from the MQS and HIP in the same tables in our data books now or in future years. We urge caution, at least in the short term, when making comparisons between estimates derived from only the MQS and HIP estimates. We are providing the following tables of harvest estimates from the MQS for your current and future reference. These tables will also be made available in *.pdf format shortly.

Sincerely,

Robert E. Trost

Robert E. Trost
Pacific Flyway Representative
